

PIT TRAINING

*"Like any path to recovery, rehabilitation from codependency is not easy, but the results are life-enhancing and sometimes even lifesaving."
- Pia Mellody*

Post Induction Therapy (PIT) is a treatment approach to developmental immaturity developed by Pia Mellody during her life-long work at The Meadows Treatment Center.

The premise of PIT is that childhood trauma, including child abuse and neglect, is the origin of developmental immaturity. The PIT treatment model goes beyond symptom-relief and instead focuses on the core Issues that maintain behavioral and relational problems.

This hands-on training is designed for mental health professionals who work with codependence issues in outpatient treatment centers and private practice settings.

As a participant, you will learn a step-by-step approach to treating the origin of clients' pain and how to facilitate healing by recognizing the core issues and secondary symptoms. You will also learn the origin of shame binds, love addiction and love avoidant relational patterns and how to use experiential work to heal trauma wounds. A somatic approach will be used to familiarize you with the ways in which our bodies facilitate healing.

*It is recommended that you attend a Survivors Workshop at The Meadows before or after the training.

**For more Information or to register please contact Kim Gould:
201-394-7156 / kim@lacrh.com**

When: March 29 - April 2, 2017, 9am-5pm
